

## Satellite tracking device delivery module (tracking)

In the Offshore La Duecento 2023 regatta is necessary to install on board a satellite location device in order to provide the online tracking service. The device and the related service is provided free of charge by the regatta organizing committee within the availability limits.

According the EC law RGD 2016/679 we inform you that the online tracking service collects and transmits yacht position at predefined time intervals and uses the owner name, sail number and boat name as provided in the regatta entry form. These data are kept on the server for a period of about 12 months in order to allow the regatta playback and are removed after this period.

**IMPORTANT!!** The tracking device must be activated and installed on board as indicated in the instructions **before 7am on Saturday 29th April 2023** in order to allow system check.

At the end of the race the device and its accessories must be deactivated and delivered back to CNSM Secretary desk by **6 pm on Tuesday 2nd May 2023**. **In case of deactivation failure, delay in delivery, missing or damaged device a penalty up to a maximum of 400,00 Euros may be charged.**

The undersigned \_\_\_\_\_ declares to understand and accept the terms of the service, with special attention to activation time, deactivation, delivery and possible penalty.

Boat name \_\_\_\_\_

Sail Number \_\_\_\_\_

Phone Number \_\_\_\_\_

E-mail \_\_\_\_\_

Device Number \_\_\_\_\_
